Thank you for accepting the invitation to participate in this study for youth in Illinois schools. The questions ask you about your health behaviors, your community, your friends, your school, and your family. This is your chance to let state and community leaders know how many young people are concerned with and affected by each of the topics covered.

This study is completely voluntary, so you may skip any questions you do not wish to answer or stop the survey at any time.

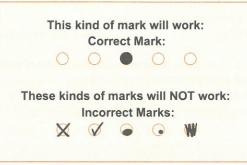

If this study is to be helpful and if you choose to begin the survey, it is important that you answer each question as thoughtfully and honestly as possible. Your answers will be kept strictly confidential. No one at school will see your answers. We ask that you do not write your name anywhere on the survey so your answers cannot be connected with your name. We also ask that you respect the privacy of others and look only at your own survey.

Other students have said that these questionnaires are interesting, and they enjoy filling them out. We hope you will, too. Please be patient if some questions don't apply to you: we need to ask everyone the same questions. Be sure to read the instructions below before you begin to answer. Thank you very much for being an important part of this project.

### 2018 ILLINOIS YOUTH SURVEY 8TH GRADE FORM

### **INSTRUCTIONS**

- 1. This is not a test, so there are no right or wrong answers; we would like you to work fairly quickly, so that you can finish.
- 2. All of the answers should be answered by marking one of the answer spaces. If you don't always find an answer that fits exactly, use the one that comes closest. If any question does not apply to you, or you are not sure of what it means, just leave it blank.
- 3. Your answers will be read automatically by a machine called an optical mark reader. Please follow these instructions carefully:
  - Use only the black lead pencil you have been given.
  - Make heavy black marks inside the circles.
  - Erase evenly any answer you wish to change.
  - Make no other markings or comments on the answer pages, since they interfere with the automatic reading.

Thank you for sharing your point of view. If any survey questions or your response to a survey question has caused you to feel uncomfortable or concerned and you would like to talk to someone about your feelings, you should talk to your school's counselor, talk to a teacher or talk to another adult you trust. If you would rather talk to someone who doesn't know you, go to the website on the pencil you were given to complete this survey (iys.cprd.illinois.edu/resources/hotlines). This website has phone numbers you can call to share your feelings with someone who can help.
