## 2020 County Report

**County Name: Shelby**

**I ILLINOIS**  
CPRD | Center for Prevention  
Research & Development  
SCHOOL OF SOCIAL WORK

*Data collected Spring 2020*

## Introduction

Based on the administration of the Illinois Youth Survey (2020), this report provides county-level data on a variety of health and social indicators including drug use, bullying, school climate, and much more. The data has been organized into topical sections as noted in the table of contents on the next page. In most cases, only a portion of schools in a county participate in the Illinois Youth Survey (IYS). County reports will only be generated when there are two or more eligible public schools from two or more districts participating at the 8th, 10th or 12th grade level. Eligible public schools are regular public schools, not specialized, that contain at least 10 students at the 8th, 10th or 12th grade level, and thus are part of the pool of schools from which the statewide sample is drawn. There will be NO DATA presented in this report for any grade level with only one district reporting. This is to protect the confidentiality of district-level results.

The IYS is offered to both public and private schools. In order to have the best understanding of how well the results in this report reflect the experiences of the youth in this county, several factors should be considered including: Public School Building Participation, Public School Student Participation, and Private School Student Participation.

### Public School Building Participation

In Table 1, the number of eligible public schools (i.e. contain at least 10 students at the 8th, 10th or 12th grade level) is compared with the actual number of IYS participating public schools in the county.

**Table 1: Public School Building IYS Participation by School Level**

Middle Schools (8th grade)		High Schools (10th and/or 12th grades)	
N Schools Participating	N Schools Eligible	N Schools Participating	N Schools Eligible
1	5	2	5

### Public School Student Participation

Table 2 provides a comparison between the actual number of students surveyed and the number of all students enrolled in public schools within the county. This percentage can be increased by surveying more schools and students within the county. Again, enrollment totals are based on student enrollment at public schools with at least 10 enrolled students at the 8th, 10th or 12th grade level. Table 2 is based solely on public school students due to the lack of available enrollment information for private schools. There will be NO DATA presented in this report for any grade level with fewer than 10 valid surveys (in the column "N Students Surveyed"). This is to protect the confidentiality of your students.

**Table 2: Public School Student IYS Participation by Grade**

	N Students Surveyed	N Enrolled Students in County	% Enrolled Students in County Report
10th	97	220	44%
12th	65	198	33%
Total	162	418	39%

### Private School Student Participation

Table 3 provides a count of the number of private school students surveyed in this county.

**Table 3: Number of Private School Students Surveyed by Grade**

8th	10th	12th	Total
0	0	0	0

Note that the data presented in this report includes both public and private schools that participated in this county. If schools that serve youth in specialized settings like charter schools, alternative schools, etc. participated in the IYS, these students are represented in the survey results but are not included in data summaries presented in Table 2 or Table 3 above.

### **Organization of the Report (Data Tables and Charts)**

Tables can be helpful when you are looking for a summary of responses for particular survey questions, for example, the percentage of 8th grade youth who report using prescription pain killers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an “N” (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an “**N/A**” (**Not Applicable**) noted in a table, this indicates that the question was **not asked at that grade level**. If you see an “**N/R**” (**Not Reported**) noted in a table, this indicates, unless otherwise specified, that at least 90% of students skipped the question for no known reason, making the results too biased to report. For Tables that are “among users” only grade levels with “at least one user” will display; grade levels with “0” users will not show.

Summary charts can be helpful to view multiple questions in one place (e.g., use of different drugs to determine which is the most used) and to compare your results with the scientific sample of Illinois students who participated in the 2018 IYS. State level results from the 2020 IYS will not be available until late fall. IYS state level norms from 2018 are a good benchmark for immediate decision-making because state estimates stay relatively stable across two IYS administration years. To locate the starting page of the Summary Charts, refer to the Table of Contents on the next page. For Charts that are “among users” only grade levels with “at least 10 users” will display.

Keep in mind that the IYS 8th grade form does not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables and charts for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on our website <http://iys.cprd.illinois.edu/results>. When looking at percentages, keep in mind that 0% is a rounded number and does not mean "0" people affected.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about this report, please call 888-333-5612 and ask for an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.

# Summary Charts

Summary charts provide a snapshot of selected health and social indicators. All charts provide grade-level data (8th, 10th, or 12th only). Some charts illustrate comparisons between one grade level of *Your Students in 2020* with the same grade level in a statewide random sample of *Illinois Students in 2018* (as noted in the introduction to your report). Other charts provide a comparison of *Your Students in 2020* across all grades surveyed to easily surface developmental trends. *Please note that there has been no 6th grade state sample since 2016, therefore no charts will display 6th grade data vs. 2018 state data for 6th graders.* Sixth grade data if available and reportable (more than 10 valid surveys) will show only on charts displaying all grade levels surveyed in 2020.

**Your report may not contain the full array of charts listed below.** As noted in the introduction to your report, there will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** in order to protect the confidentiality of your students. In addition, the IYS 8th grade form contains a subset of the questions asked on the IYS high school form. As a result, some of the charts listed below may not be included in your report. Information about the availability of grade-specific charts or data is defined for each chart below. If an item within a chart is not displayed for a grade level (most often - 8th grade), a footnote is included on the chart to explain.

## Substance Use Behaviors and Consequences

### *Substance Use in the Past Year*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018
- Note that in the 2020 survey, questions for tobacco products are separate from questions for e-cigarettes and other vaping products.

### *Substance Use in the Past 30 Days*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018

### *First Use (New Users) in the Past 12 Months*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018

### *Source of Alcohol in the Past Year: Among 12th Grade Alcohol Users*

- ONLY charted for 12th graders because of low number of users in lower grades. When N (number of users) is less than 10, data for "Your Students 2020" will not display
- Your Students in 2020 compared to Illinois Students in 2018
- Note that alcohol sources are classified into types based on responses to a specific set of questions on the IYS. To determine what items are included in each type of alcohol source, refer to the relevant tables in the "**Drug Use Contributing Factors**" section of this report.

### *Source of E-Cigarettes or Other Vaping Products in the Past Year: Among 12th Grade E-Cigarettes or Other Vaping Products Users*

- ONLY charted for 12th graders because of low number of users in lower grades. When N (number of users) is less than 10, data for "Your Students 2020" will not display
- New question added in 2020; no comparison with Illinois Students in 2018
- Note that e-cigarette or other vaping products sources are single item questions, not classified into types. Source of access questions were simplified to keep the most common sources.

### *Source of Any Tobacco Products (excluding e-cigarettes) in the Past Year: Among 12th Grade Any Tobacco Products (excluding e-cigarettes) Users*

- ONLY charted for 12th graders because of low number of users in lower grades. When N (number of users) is less than 10, data for "Your Students 2020" will not display
- New question added in 2020; no comparison with Illinois Students in 2018
- Note that any tobacco products sources are single item questions, not classified into types. Source of access questions were simplified to keep the most common sources.

### *Source of Marijuana in the Past Year: Among 12th Grade Marijuana Users*

- ONLY charted for 12th graders because of low number of users in lower grades. When N (number of users) is less than 10, data for “Your Students 2020” will not display
- Your Students in 2020 compared to Illinois Students in 2018
- Note that some marijuana sources are classified into types based on responses to a specific set of questions on the IYS. To determine what items are included in each type of marijuana source, refer to the relevant tables in the “**Drug Use Contributing Factors**” section of this report.

### *Source of Prescription Drugs in the Past Year: Among 12th Grade Prescription Drug Users*

- ONLY charted for 12th graders because of low number of users in lower grades. When N (number of users) is less than 10, data for “Your Students 2020” will not display
- Your Students in 2020 compared to Illinois Students in 2018
- Note that some prescription drug sources are classified into types based on responses to a specific set of questions on the IYS. To determine what items are included in each type of prescription drug source, refer to the relevant tables in the “**Drug Use Contributing Factors**” section of this report.

### *Driving Under the Influence in the Past Year*

- Separate chart displayed for each grade level surveyed (NOT included on the IYS 8th grade form)
- Your Students in 2020 compared to Illinois Students in 2018

### *High School Students Who Experienced 2 or More Consequences According to the CRAFFT Screening Questions*

- Separate chart displayed for each grade level surveyed (NOT included on the IYS 8th grade form)
- Your Students in 2020 compared to Illinois Students in 2018
- Note that these students may benefit from an individual substance use disorder assessment.

## **Interpersonal Violence and Safety**

### *Bullying Victimization in the Past 12 Months*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018

### *Extent of Bullying in the Past 12 Months*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018

### *Bias-Based Bullying Victimization in the Past 12 Months*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018

### *Dating Violence in the Past 12 Months By Grade*

- Dating Violence is defined as being “slapped, kicked, punched, hit, or threatened in a dating relationship.”
- One chart displaying all grade levels surveyed
- Your Students in 2020 compared to Illinois Students in 2018

## **School Climate**

### *Student Perceptions of School Climate Mean Scores*

- Separate chart displayed for each grade level surveyed
- Your Students in 2020 compared to Illinois Students in 2018
- In order to compare perceptions across different dimensions of school climate, a mean score for each school climate scale (*Caring Adults, High Expectations, Meaningful Participation, and School Connectedness*) is adjusted to a 4-point scale, where “1”= the least positive and “4”= the most positive perception. To determine what IYS questions are included in each school climate scale, refer to the relevant tables in the “**Academic and School Experiences**” section of this report.

### *Student Perceptions of School Climate Mean Scores: By Grade*

- One chart displaying all grade levels surveyed
- In order to compare perceptions across different dimensions of school climate, a mean score for each school climate scale (*Caring Adults, High Expectations, Meaningful Participation, and School Connectedness*) is adjusted to a 4-point scale, where “1”= the least positive and “4”= the most positive perception. To determine what IYS questions are included in each school climate scale, refer to the relevant tables in the “**Academic and School Experiences**” section of this report.
