SCHOOL OF SOCIAL WORK

Data collected Spring 2022

Introduction

Based on the administration of the Illinois Youth Survey (2022), this report provides county-level data on a variety of health and social indicators including drug use, bullying, school climate, and much more. The data has been organized into topical sections as noted in the table of contents. In some cases, only a portion of schools in a county participate in the Illinois Youth Survey (IYS). County reports will only be generated when there are two or more eligible public schools from two or more districts participating at the 8th, 10th or 12th grade level. Eligible public schools are regular public schools, not specialized, that contain at least 10 students at the 8th, 10th or 12th grade level, and thus are part of the pool of schools from which the statewide sample is drawn. There will be NO DATA presented in this report for any grade level with data from only one district. This is to protect the confidentiality of district-level results.

There has been a change in the way that ISBE reports school enrollment data that affects the data we are able to provide in this report. We do not have enrollment data for non-participating schools in the county and thus cannot provide an estimate of overall county enrollment. The list of schools that contributed to the data in this report can be found following the table of contents.

In the table below, the number of eligible public schools (schools that contain at least 10 students at the 8th, 10th or 12th grade level) is compared with the actual number of IYS participating public schools in the county.

Public School Building IYS Participation by School Level

Middle Schools (8th grade)		High Schools (10th and/or 12th grades)	
N Schools Participating	N Schools Eligible	N Schools Participating	N Schools Eligible
5	8	2	3

The data presented in this report includes both public and private schools that participated in this county. If schools that serve youth in specialized settings like charter schools, alternative schools, etc. participated in the IYS, those students are also represented in the survey results in this report.

The IYS 8th grade form does not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on the IYS website at <http://iys.cprd.illinois.edu/results>.

When looking at percentages, keep in mind that 0% is a rounded number and may not mean "0" people affected.

Tables can be helpful when you are looking for a summary of responses for particular survey questions, for example, the percentage of 8th grade youth who report using prescription pain killers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an "N" (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an "**N/A**" (**Not Applicable**) noted in a table, this indicates that the question was **not asked at that grade level**. If you see an "**N/R**" (**Not Reported**) noted in a table, this indicates, unless otherwise specified, that at least 90% of students skipped the question for no known reason, making the results too biased to report. For tables that are "among users" only grade levels with "at least one user" will display; grade levels with "0" users will not show.

Summary charts were provided in previous years to help you compare your results to a random sample of students across the state of Illinois. Due to the COVID-19 pandemic and subsequent school closures, an IYS state sample is not available for 2020 and there are no summary charts included in this report. State level results from the 2022 IYS will be available in late fall, so you will be able to compare these results to the state estimate at that time. Until then, you can compare these results to a county with similar characteristics, or to the 2020 report for suburban Chicago counties, other urban/suburban counties, or rural counties (Chicago is not available). All of these reports are available on the IYS website. Summary charts will return in the next IYS administration year.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about this report, please call 888-333-5612 and ask for an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.

Table of Contents

Data Tables
