Data collected Spring 2024

Introduction

Based on the administration of the Illinois Youth Survey (2024), this report provides county-level data on a variety of health and social indicators including drug use, bullying, school climate, and much more. The data has been organized into topical sections as noted in the table of contents. In some cases, only a portion of schools in a county participate in the Illinois Youth Survey (IYS). County reports are generated when there are two or more eligible public schools from two or more districts participating at the 8th, 10th, or 12th grade level. Eligible public schools are regular public schools, not specialized, that contain at least 10 students at the 8th, 10th, or 12th grade level, and thus are part of the pool of schools from which the statewide sample is drawn.

The IYS is offered to both public and private schools. Because of the lack of available enrollment information for private schools, the participation tables below reflect public school data only.

Public School Building Participation

In Table 1, the number of eligible public schools (schools that contain at least 10 students at the 8th, 10th, or 12th grade level) is compared with the actual number of IYS participating public schools in the county. There will be no data presented in this report for any grade level with data from only one district. This is to protect the confidentiality of district-level results.

Table 1: Public School Building IYS Participation by School Level

Middle Schools (8th grade)		High Schools (10th and/or 12th grades)	
N Schools Participating	N Schools Eligible	N Schools Participating	N Schools Eligible
2	2	2	2

Public School Student Participation

Table 2 compares the actual number of students surveyed with the number of all students enrolled in public schools within the county. Again, enrollment totals are based on student enrollment at public schools with at least 10 enrolled students at the 8th, 10th or 12th grade level. Table 2 is based solely on public school students due to the lack of available enrollment information for private schools. There will be no data presented in this report for any grade level with fewer than 10 valid surveys (in the column "N Students Surveyed"). This is to protect student confidentiality.

Table 2: Public School Student IYS Participation by Grade

	N Students Surveyed	N Enrolled Students in County	% Enrolled Students in County Report
8th	124	143	87%
10th	112	176	64%
12th	78	170	46%
Total	314	489	64%

Tips for Using this Report

The data presented in this report reflects participating public and private schools in this county, as well as schools that serve youth in specialized settings such as charter schools or alternative schools. The list of schools that contributed to the data can be found following the table of contents.

The IYS 8th grade survey form does not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on the IYS website at <http://iys.cprd.illinois.edu/results>.

When looking at percentages, keep in mind that 0% may be a rounded number that does not mean "0" people affected. For example, a value of 0.4% would be rounded down to 0%.

Tables can be helpful when you are looking for a summary of responses for a particular survey question, for example, the percentage of 8th grade youth who report using prescription pain killers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an "N" (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an "**N/A**" (**Not Applicable**) noted in a table, this indicates that the question was **not asked at that grade level**. If you see an "**N/R**" (**Not Reported**) noted in a table, this indicates, unless otherwise specified, that at least 90% of students skipped the question for no known reason, making the results too biased to report. For tables that are "among users" only grade levels with "at least one user" will display; grade levels with "0" users will not show.

Summary charts were provided in previous years to help you compare local results to a random sample of students across the state of Illinois. Due to the lingering effects of the COVID-19 pandemic and a subsequent decline in participation, an IYS state sample is not available for 2022 and there are no summary charts included in this report. State level results from the 2024 IYS will be available in late fall. Until then, you can compare these results to a county with similar characteristics, or to the 2020 report for suburban Chicago counties, other urban/suburban counties, or rural counties (Chicago is not available). All of these reports are available on the IYS website.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about this report, please call 888-333-5612 to speak to an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.
