Overview of the Illinois Youth Survey

The Illinois Department of Human Services (IDHS) has funded the administration of the Illinois Youth Survey (IYS) biennially since 1993. The IYS is a self-report survey administered in school settings and is designed to gather information about a variety of health and social indicators including substance use patterns and attitudes of Illinois youth.

The administration of the IYS has two major goals, the first of which is to supply local data to schools and school districts throughout Illinois. During state funded survey years (e.g. 2008, 2010, 2012, 2014, 2016, etc.), the survey is available to all public and private schools in the state at no cost. Each participating school is eligible to receive a report specific to their own student responses. These local reports provide critical information to school administrators, prevention professionals, and community members as they work to address substance abuse issues in their communities.

The second goal of administering the IYS is to provide a scientific estimate of health and social indicators for the state of Illinois. The scientific estimate is based on drawing a random sample to represent the state population of 8th, 10th, and 12th graders in Illinois' public schools. The sampling design assures that youth in the state sample are representative of the state's diverse community types. These community types have been defined based on the "urbanicity" of the school's setting. Each county in Illinois is assigned a type based on the Federal Office of Management and Budget's definitions of Metropolitan Statistical Areas (MSAs). Schools are assigned to a county based on the Illinois State Board of Education's county designation for the applicable school district. Because Cook County is a blend of the City of Chicago and suburban communities, the City of Chicago schools are reported and sampled as a separate community type. The four types of Illinois communities based on their "urbanicity" include: 1) *City of Chicago*, 2) *Suburban Chicago Counties including Suburban Cook, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, and Will*, 3) *Other Urban/Suburban Counties excluding Suburban Chicago Counties*, and 4) *Rural Counties*.

This *Illinois Youth Survey 2016 Frequency Report: Suburban Chicago* presents findings based on data gathered January–June 2016 from students in the random sample of schools and scientifically weighted to represent 8th, 10th and 12th graders attending public schools in suburban Chicago counties (excluding the City of Chicago).
