## Overview of the Illinois Youth Survey

The Illinois Department of Human Services (IDHS) has funded the administration of the Illinois Youth Survey (IYS) biennially since 1993. The IYS is a self-report survey administered in school settings and is designed to gather information about a variety of health and social indicators including substance use patterns and attitudes of Illinois youth.

The administration of the IYS has two major goals, the first of which is to supply local data to schools and school districts throughout Illinois. During state funded survey years (2016, 2018, 2020, etc.), the survey is available to all public and private schools in the state at no cost. Each participating school is eligible to receive a report specific to their own student responses. These local reports provide critical information to school administrators, prevention professionals, and community members as they work to address substance use issues in their communities.

The second goal of administering the IYS is to provide a scientific estimate of health and social indicators for the state of Illinois. The scientific estimate is based on drawing a random sample to represent the state population of 8<sup>th</sup>, 10<sup>th</sup>, and 12<sup>th</sup> graders in Illinois' public schools. The sampling design assures that youth in the state sample represent the state's diverse community types.

These community types have been defined based on the 'urbanicity' of the school's setting. Each county in Illinois is assigned a type based on the Federal Office of Management and Budget's definitions of Metropolitan Statistical Areas (MSAs). Schools are assigned to a county based on the Illinois State Board of Education's county designation for the applicable school district. Because Cook County is a blend of the city of Chicago and suburban communities, city of Chicago schools are reported and sampled as a separate community type.

The four types of Illinois communities based on their urbanicity include: 1) *City of Chicago*, 2) *Suburban Chicago counties including suburban Cook, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, McHenry, and Will*, 3) *Other Urban/Suburban counties excluding suburban Chicago counties*, and 4) *Rural counties*.

This *Illinois Youth Survey 2020 Frequency Report: Other Urban/Suburban* presents findings based on data gathered January–March 2020 from students in the random sample of schools and scientifically weighted to represent 8<sup>th</sup>, 10<sup>th</sup>, and 12<sup>th</sup> graders attending public schools in urban and suburban counties outside the Chicago metropolitan area.

The 2020 IYS was impacted by COVID-19 and the school shutdown that began on March 17, 2020. This resulted in lower participation statewide, with sufficient data collected from only three of the four strata. As a result, a strata report for the city of Chicago and a statewide report will not be produced for 2020.
